

Meet in Mumbai to explore possibilities with Canadian Wood

Sanjay Gupta- Market and Product Development specialist wood products_ FII India addressing the gathering_

■ Forestry Innovation Consulting India Pvt. Ltd. (FII India) organized a Woodworking professionals Meet in Mumbai which showcased the versatility of Canadian Wood species - Western Hemlock, Yellow-Cedar, Douglas-fir, SPF and Western Red Cedar. The event saw a gathering of 130 attendees which included contractors, carpenters and other woodworking professionals. The seminar conducted by Canadian Wood experts educated the audience on lumber sizes, grades, individual species' features and availability in India.

The event proved to be an excellent platform for knowledge sharing, networking and allowed people to experience first-hand the qualities of Canadian Wood. An interactive session covered several topics such as use of wood in furniture, panelling, door and door frames, outdoor applications of decking, gazebos etc.
